

TIGMAX

PEANUT CRUSH MACHINE

It mainly function is crush the grain,wheat,rye,barley, rice,corn,bean,peanut,feed,flavoring,hot pepper ect to be powder. It output is 80 - 180kg/hour, It is pretty small and use in family so good, This machine most advantage is user can change mesh to get difference size powder,if user want big powder then use big hole mesh,if user want the small powder then use the small hole mesh,we have five type mesh to meet customer's small or big powder need.

This machine widely be used in agricultural family. Farm ect, user can move it to anywhere use,it good quality can use many years.

Model	Rotator Diameter	Main Shaft Speed	Material Consumption of each ton	Productivity	Match Power	Voltage	Frequency
9FP-23	23cm	2800 r/min	≤11kw - h/t	≥100kg/h	1.1kw	220v	50hz
