## Flour Crush Machine

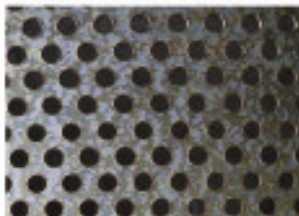

**Coconut Shell Powder**

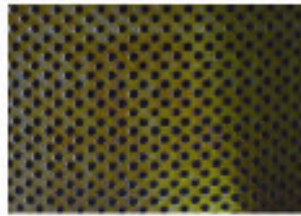

**Corn Leaf (Dry)**

**This machine can drive by electric motor or diesel engine**

**3mm**

**2mm**

**1.5mm**

**1mm**

### 1.1 Product characteristics and functions

Rice-straw flour crush machine mainly function is crush the dry or wet long goods and short goods, such as : cornstalk,wheat-straw,rice-straw,Corn,bone,fish,cane,cassava,groundnut,tomato,bean, potato,sweet-potato,spices,capsicum,garlic,tea,leaf ect to be flour,the flour to feed animals,such as : cock,duck,pig,cow,sheep,horse ect;its output is 4 tons/day

Its most advantage is user can change mesh to get difference size flour or powder,if user want big powder then use big hole mesh,if user want the small powder then use the small mesh,we have five type mesh to meet customer's small or big powder need.its output 400kg/hour.

Rice-straw flour crush machine is the product developed in our company,the character of the new type machine are compact structure,widely using,convenient maintenance good performance,ect.

### 1.2 Use Surrounding

Surrounding and running condition should be at :normal temperature;

### 1.3 Work conditions

This machine running place shall be ventilation,dryness,commodiousness,brightness and with fire-extinguishing.

| Model   | Rotator diameter | Main shaft speed | Material consumption of each ton | Productivity | Match power | Voltage | Frequency | Sound   |
|---------|------------------|------------------|----------------------------------|--------------|-------------|---------|-----------|---------|
| 9FP-20C | 20cm             | 4600r/min        | ≤ 11kw / h/t                     | ≥ 300kg/h    | 2.2kw       | 220v    | 50hz      | 93dB(A) |
