## HIGH PERFORMANCE 2-STROKE TCW-3 ENGINE OIL

The additives are of the best quality and chosen to lessen carbon in the crankcase which can occur from using low-quality fuel.

It reduces high temperature of the engine which caused by low - quality fuel and lowers wear and tear on the bearing and cylinder wall.

The oil's lower ash content protects the silencer and reduces deposits in the engine.

This oil is well suited for use in various other 2-stroke engines such as chainsaw , trimmer , outboard engine , mopeds and motorcycles both for premix in fuel and oil - injection systems
